

Instructors at DC Lamaze want to assure every expectant parent has the best possible opportunity to prepare for their special day! We provide online resources to supplement your instruction with the following tools for your learner preferences:

- **Seizure Safe Profile Settings:** Clears flashes and reduces color for users with epilepsy.
- **Vision Impaired Profile Settings:** Enhances website's visuals with font size, type changes, spacing options, color contrast, and more.
- **ADHD-Friendly Profile Settings:** Provides more focus and fewer distractions by allowing the learner to accentuate just certain parts of the web page at a time.
- **Keyboard Navigation:** Allows users to access and use the website with a keyboard, instead of a mouse.
- **Screen Reader:** This feature optimizes the website for using screen readers.
- Plus, more custom settings are available.
